### iOS: How to install and use Youkey SonoiQ APP on iOS

Before all of the Youkey SonoiQ iOS software instructions:

a. Turn off the "Auto Join" of iOS WiFi connection after you connect the iOS device with Youkey product.

<u>b. Turn off the WiFi of iOS device after you finish the exams and exit the SonoiQ software.</u>

1. You can search "SonoiQ" or "Youkey" on Apple Store to download the

iOS software.(SonoiQVet is for veterinary use)

2. Then just install software and run it, make sure you allow SonoiQ to

access "Photos"-"Read and Write".

# Youkey Bio-Medical Electronics Co., Ltd.

After you connect the probe to iOS device.

For iOS 11 or newer: Click the 'i' button in Wi-Fi settings and turn off the "Auto-Join". Always turn off the Wi-Fi when you finish the exam and exit software on iPad or iPhone. Then you can turn on the WiFi again. Or you will not able to connect the probe to other devices. For iOS under 10: Always remember to forget the WiFi connection after you finish all the exams. Because one wireless probe can only be connected by one display device at one time.

### iOS APP don't support USB connection due to the limitations of the

## iOS system.

#### Android: How to install and use Youkey SonoiQ APP on Android

1. Search "SonoiQ" or "Youkey" on Google Play to download the APP.

(SonoiQVet is for veterinary use)

If your Android device do not support Google Play, download the Android

APK file at this link: <a href="https://www.youkeymedical.com/app">https://www.youkeymedical.com/app</a>

Click this icon

#### 2. Then just install software then enable permissions

## 3. Click "Apps & notifications" in Settings and choose "SonoiQ"

		China U	nicom 🖪 💊 🔿 🖪	158 B/s 🛈 🕶 🗟 🛄 👪 17:05

5. You need also open the location before you run the software After enter

the software, click WIFI mark

6. Just find the probe ID, click "connect", the click "OK"

Double click back "return key" to exit the APP and the WiFi will be

## disconnected automaticly.

7. After connected, slide screen to enter different modes and adjust

8. Enter C mode, you can also change the size of sample window, move it and freeze the image.

9. Click menu mark, you can see the information about our wireless

ultrasound system, if you have some problems, you can show it to us

#### Android: How to use USB connection on Android device

 First, you may need to connect the machine with Android device by USB cable like this(Using an OTG plug):

Or connect the USB-C cable with USB-C port display device directly. Note: connect the straight port to the main unit.

Turn on the software, it will show the permission to use USB device automatically, click yes. Then click the probe icon, then you can connect the machine with the Android device, but please make sure that the machine is disconnected with Android device through WIFI.

#### Windows: How to use USB connection on Windows computer

1. If you want to use the USB connection with Youkey WiFi probe, you need to install the driver.

Please find the driver in the SonoiQ folder and install the right one which suits your personal computer system.

For example, the demo PC is based on Windows 10 x64. Here are the

#### following procedure.

📙   🛃 📕 🖛   SonoiQ		
File Home Share View		
Pin to Quick Copy Paste	Move Copy to x to x	New item •
Clipboard	Organize	New
	(Dr) + SamaiO	
$\leftarrow \rightarrow \uparrow \uparrow \square \rightarrow ThisPC \rightarrow Fouke$	y (D:) > SonoiQ
